

GE Healthcare

# ReadyToProcess.

Join the quick-change revolution.

Get ready for faster processing and simpler operations with the new ready-to-use products from GE Healthcare. Designed for seamless, scalable operations upstream and downstream, the ReadyToProcess™ portfolio comprises a wide range of products across cell culture, filtration and chromatography, as well as storage and the connections in between. Some are single use, such as the Wave Bioreactor™ and Cellbag™, while others are limited use, such as prepacked chromatography columns.

ReadyToProcess also enables lean biopharmaceutical development and allows maximum flexibility of operations. ReadyToProcess – get ready for the revolution.
